9. To exercise professionalism at all times in all aspects of the hunting profession.
10. To always ensure internationally acceptable humane practices in the utilization of wildlife.

Principals of FAIR CHASE are defined by the African Code of Hunting Ethics:

1. The pursuit of free wild animals, possessing the natural behavioral inclination to escape from a hunter, and be fully free to do so.
2. Wild animals are not to be hunted with an artificial light source or other similar technical equipment. A motorized mode of transport may not be used to chase the said animal.
3. No ethical hunter, while hunting, shall willfully disturb or take visibly pregnant females or females with dependent young.
4. A wild animal should exist as a naturally interacting individual of a wild sustainable population located in an area that meets both spatial and temporal requirements of the population of which that individual is a member.
5. Wild animals should be hunted sustainably within an ecological functional system.

The above fair chase principals exclude practices known as “put and take” as well as any form of manipulated “canned hunt”.

Should a member contravene any of the above paragraphs his/her membership with the Namibia Professional Hunting Association may cease!

I hereby declare that:

1. I have read the Code of Conduct and fully understand the contents of it.
